

## SUGGESTED READING

“The governance of critical global resources – water, old growth forests, fisheries and the internet itself – has been a key focus of our research over the last five years. When we use the word, governance, we mean stewardship, which involves collaborating, identifying common interests and creating incentives to act on them. We do not mean government, which involves legislating and regulating behaviour and punishing those who misbehave.”

— Don Tapscott and Alex Tapscott,  
*“Realizing the Potential of Blockchain”*

“The root problem with conventional currency is all the trust that’s required to make it work. The central bank must be trusted not to debase the currency, but the history of fiat currencies is full of breaches of that trust. Banks must be trusted to hold our money and transfer it electronically, but they lend it out in waves of credit bubbles with barely a fraction in reserve. We have to trust them with our privacy, trust them not to let identity thieves drain our accounts.”

— Satoshi Nakamoto
